

Learn to Play, Play to Learn

Welcome to Imagination Gaming in PRU's and SCC's!

Imagination Gaming specialises in **engaging even the most disaffected learners**, offering solutions to social and skills development through play... not through technology, but through face-to-face interactions with each other. We can not only capture your students imagination but create a fun and enjoyable environment for all!

We understand just how difficult it can be to engage students in Pupil Referral Units, Secure Care Centre's and other similar facilities. Irrespective of the level of SEN, we can offer something to those with **profound, medical, social, emotional, and psychological barriers to learning**.

With a wealth of experience working with hard to reach students, since 2007 Imagination Gaming have made incorporating games simple, beneficial and most crucially, sustainable. We can provide instant and **regular intervention to inspire your students** towards winning ways!

"I have in the past and will continue to recommend Imagination Gaming to any provision or school..."

Victoria Whittaker, Highwell Special School, Wakefield

Our games days and programmes can focus on:

- PSHE Days - social skills, cooperation and competition
- Maths Days - numbers, sums, money, shape, space and balance
- Literacy Days - written, verbal and non-verbal communication, wordplay and reading

The games and activities can develop and support:

-  CURRICULUM BASED KNOWLEDGE
-  SOCIAL & EMOTIONAL DEVELOPMENT
-  PATIENCE, RESILIENCE AND CONFIDENCE
-  PROBLEM SOLVING
-  PLANNING & STRATEGIC THINKING
-  COGNITIVE DEVELOPMENT

Imagination Gaming - It's a game-changer!

A team experienced in these environments and students, we can use our unique approach to not only capture their attention, but hold their interest and start to challenge their thinking and behaviours. Coupled with unparalleled access to an amazing range of a new breed of games from all over the world, we use intriguing modern twists on traditional style table-top games to engage, enthuse and educate all ages, abilities and attitudes.

"When Imagination Gaming arrive with their own brand of enthusiasm and skills we see full participation and not just for short periods."

**Ian Fowler, Learning Coordinator
Aldine House, Sheffield**

Socially, games can challenge and shape a wealth of behaviours and opinions. Playing cooperatively or competitively to achieve group or individual goals is a fantastic way to get even the most reticent of learners to think about their actions and decisions, and how this will affect not only their own aspirations but

the reactions of others too. This in turn focuses their minds to how they interact with the people around them. For example, negotiation through teamwork and bluff, and appreciating the goals of others, helps to strengthen communication skills and develop empathy and understanding too.

"For the past 4 years... flexible, conscientious and consistent, IG offer an innovative approach for students to access embedded literacy, numeracy, social and communication skills."

Richard Smith, High Needs Provision, Sheffield Council

Games support and develop key curriculum skills such as language and mathematics. Requiring discussion and decision making, verbal and non-verbal communication, or more directly clever word-play and expression make language more interesting and exciting.

At the same time games challenge all kinds of mathematical thinking, be it simple number-play, an understanding of shape and balance, probability and risk assessment, or clear process, strategy and logical thinking. Immediately your students will be making strides they don't even realise.

We offer all of the above and much more, to help make your learning environment appealing and successful!

Our Mission!

At Imagination Gaming we aim to engage, excite and educate all ages, abilities and attitudes that we interact with, making it easy for schools to inspire and educate in a fun and accessible way for all.
