

cannot be played again, everyone now chooses a new card to battle and you repeat the battle stage.

This game is perfect for family games night and enjoyable for all age ranges. It is short, easy to learn and an exciting play. I recommend 3 chapters and would definitely play it again. 3 chapters is undeniably fun as every game has unexpected twists, whether you win or lose the game is full of excitement and laughter.

However, there are a couple improvements I would make, such as, adding a few action cards, allowing you to swap one of your cards with someone next to you, or your chosen card gets 10 bonus points, for the price of one heart token, just to add suspense and friendly rivalry to the match.

Overall I completely recommend three chapters. It is fun, compact, and brings people together. 3 Chapters deserves a solid 8.8 out of 10, because of its simple structure, yet impactful, strategic, mindset. I shall definitely recommend this family game, perfect for gatherings, games nights and just having fun with friends. It uses strategy, thinking ahead, and unpredictable twists to create a fantastic game.
