

## Cabanga

Made by Lottie 

Cabanga is a unique card game with colourful cards and lots of knowledge. The game is about trying to get rid of your cards and to match up colours with the cards in the middle of the table. You have 7 cards each and your trying to match the card with the colours in the middle of the table but when another player has put that card in a colour you couldn't put your card in that that colour next.

You each have 7 cards and there are 5 cards in the middle with a mask on them there will be 5 cards next to the 5 cards in the middle of that colour next to them and you have to place a card with a small gap in the middle for example 17 and 18 because there is no gap in between. You take turns to place a card down you don't use dice and you are in competition. It is hard at first but you get the hang of it when you start playing.

My favourite part of the game is to give my cards to the people with a gap in there number for example 13 and 17 I could through cards at them with the number 14,15 or 16.I liked it because it was a fun competitive game with lots of enthusiastic players.

The game is really enjoyable because you have to use your brain and outsmart the competition. The game is exciting because you get to outsmart the competition and through lots of cards at people.

My friends and family would probably love this game because of were all so competitive. It is better with more people because you get to through more cards and outsmart your family.

The cards in the middle have mask on them and the colours are purple, blue, yellow and red. The cards that you have are them colours that I said but they just have numbers on the cards that you have. They were fun to look at because their colours were outstanding.

I would love to play this game again because I think it has so much more fun to give. I would not like to change anything about the game because I think it's awesome the way it is.

I would give the rating a whopping 10/10.

If my friends were to ask me about the game I would say, "Girl's you have to play this because it is so outstanding and makes your brain get pumped up,"
