

# Mi Box Live – Review

Mi Box Live is a maths related game asking you maths questions from the 1-20 times tables and it's a really good game for maths-lovers. It's a competitive game that encourages quick thinking and a bit of friendly rivalry.

Mi box live uses colourful characters, a racetrack, flash cards and so much more! In Mi Box Live, you have to try and be the first one to make a lap around the racetrack. To play, somebody answer it on your whiteboard in a certain amount of time. If you answer the question correctly within the time limit you get to roll the dice and move forward but if you answer the question incorrectly, you must keep your character where it is. You just keep on doing this over and over until somebody reaches the racetrack.

My favourite part of Mi Box Live are the maths questions because I love maths. Whether you're laughing at someone for all of the questions wrong the entire time' or just celebrating a clever win, there's never a dull movement. This game is exciting yet hilarious. That's why I love it.

I think that anybody that likes friendly competition would love Mi Box Live. It's perfect for friends, family and people of all ages because it's easy to learn but still requires a little bit of thinking.

I would absolutely play Mi Box Live again. It's a game you can play over and over again because no 2 rounds are ever the same. If I could change anything it would be to add more colour to the cards because they are just white and dull but otherwise, I love it.

I would give Mi Box Live a solid 10/10! It is a fun accessible game and brings people together to have a good time. If anybody asked about the game I would totally recommend it. It combines strategy, luck and plenty of laughs, making this a must have for any game collection.
